

ALL MINE PET BOWL

Convenient, Selective Feeding for Cats and Dogs

Product Benefits

Description The All Mine Pet Bowl is an "intelligent" bowl that will only allow the specified pet to access the food. Utilizing radio frequency signals embedded in a transmitter in the pet's collar, only the pet wearing the specific transmitter can access the food.

Differentiation/Uniqueness The All Mine Pet Bowl's patented system provides an effective solution that allows pet owners of dogs and cats having different nutritional requirements to feed them properly. No more dogs eating the cat food or a dominant dog eating all the food. Also, with different pet food formulas for young and old pets, this pet bowl solution will allow the pet owner to tailor a feeding program specifically for any pet needing it.

PRODUCT SNAPSHOT

Intellectual Property

The product is supported by 1 US patent (7,124,707).
Issue Date: October 24, 2006

Development

Computer rendering design and animation completed,
not prototyped or practiced commercially.

Licensing

- **Collaboration Sought:** License, For Sale
- **Terms:** Exclusive or nonexclusive will be considered
- **Status:** Has engaged in introductions
- **Support:** Documentation and available technical assistance
